

TRUTH – KNOWLEDGE – REASON – WISDOM – ENLIGHTENMENT – FAITH
www.ChurchofUniversalTruth.net

We are living in a time of great discovery, knowledge and enlightenment, but also at a time of great peril the likes of which humankind has never before experienced...
...but it is also a time of great opportunity...

The Re-convergence of Science and Theology

The history of Science is that it was originally given birth through Theology. Over time, science had eventually diverged from theology as many scientists began to believe that they were discovering 'rational' and experiential explanations for the workings of the known Universe. Many of these scientists began to turn agnostic if not outright atheistic as they came to believe that they were defining the workings of the World without the help of a 'Creator'. Over time, as advances in technologies in scientific instrumentation and techniques had allowed humankind the expanded vision achieved through the advent of space telescopes and particle accelerators, a different kind of 'narrative' had begun to emerge that would begin to affect the thinking of these 'observers' of the nature of our 'reality'. In science we have a process based on observation and experimentation that seeks to define scientific fact as to what we can know to be true of nature. Every time we discover a provable scientific fact, it tends to open up many more new questions that still need to be answered. This is where we come to 'scientific theory'. Theories are a way to postulate based on what we know to be true as scientists 'best guess' (or guesses) based on the evidence we have already established. From atoms to galaxies, the facts about the nature of our Universe and our reality are astounding enough as it is, but the direction the facts that lead us into the theoretical realms are even much more fantastic than anyone on this Earth could ever have imagined...

Introducing the:

- The oneness of all mankind
- The independent investigation of truth
- The common foundation of all religions
- The essential harmony of science and religion
- The equality of rights of men and women
- Universal education, understanding and tolerance
- The eventual elimination of prejudice of all kinds
- Universal Peace for all mankind

God tends to come to us more often in the form of a 'whisper' than he does as a 'thunderclap'...

www.CommunityofFaiths.net

The Truth is: We are all beings made up of Stardust and Energy; We live in fields of energy all around us; We are all as old as the Universe itself; We are all connected by and to a Universal Intelligence (God); and we all live in a multi-dimensional, multi-vibrational, 'multi-verse' of Life. Science is actually re-converging with Theology by helping to prove the existence of God the Creator. So, no matter what your skin color, the color of your hair, your eyes, your language, where you come from or your ethnicity, we are all made of the same 'stuff' simply 'packaged' differently. And, we have all been granted the extraordinary gift of creativity and the divine recognition of a higher power greater than ourselves.

**It's time for a World spiritual re-awakening, a revival, a resurgence...
...A 'New Renaissance' of Truth, Discovery, and Fellowship...**

You are currently on a 4.5 billion
year old spaceship.

A self sufficient, organic, complex spaceship.

You are orbiting a power source that
is a million times larger than your ship.

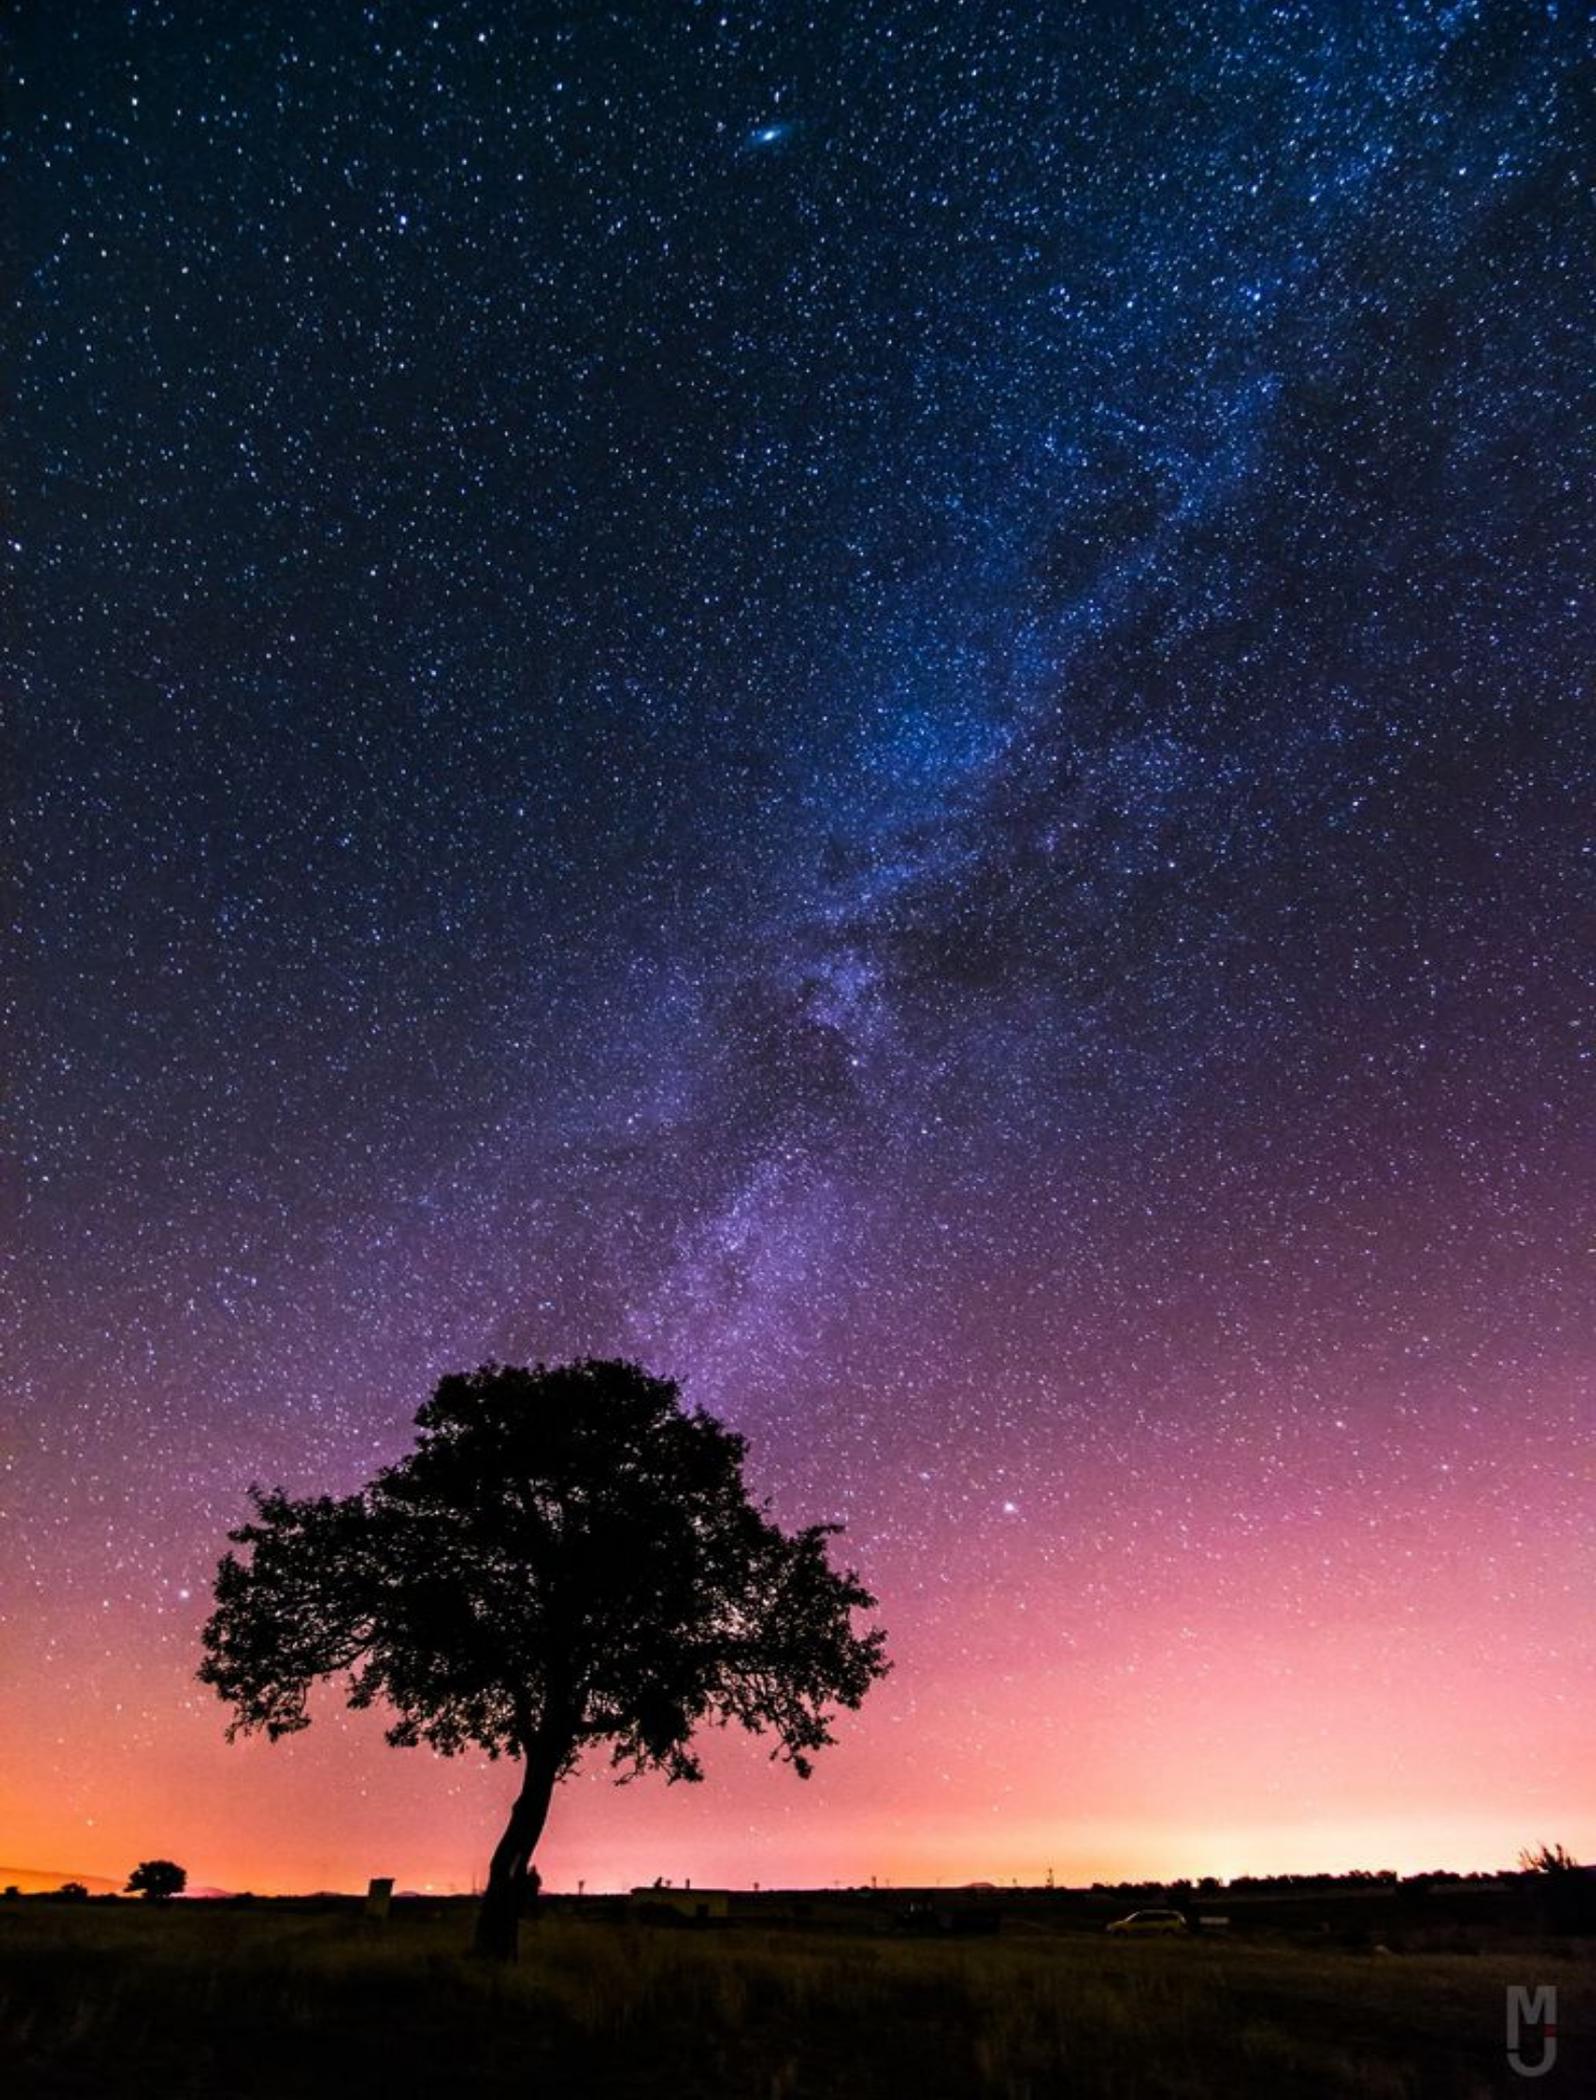

There are 200 billion more power sources,
possibly with ships like yours, in your group.

There are 40 more groups in
your particular neighborhood.

Your neighborhood is moving at 2 million
miles per hour to an object that
is 150 million light years away.

Welcome to life. It's more exciting
when you think on a larger scale.

“The gift of mental power comes from God, Divine Being, and if we concentrate our minds on that truth, we become in tune with this great power.”

WAYSEER

~ Nikola Tesla

N. TESLA 12/12/12

MAP TO MULTIPLICATION

The number 3 multiplies itself through the system as a perfect square. It bounces from position 3, to 6, to 9, to 12. All multiples of 3 are found in these positions.

The number 4 multiplies itself through the system as an Equilateral Triangle. It bounces between positions 4, 8, and 12. All multiples of 4 bounce in these positions.

2 and to act as "doubblers," alternating between the doubling of prime positions next to them and across

The number 6 multiplies itself through the system as a straight line. It bounces back and forth between positions 6 and 12.

COMPOSITES and PRIMES

as a self organized system

5 is the first prime position. It functions as a star in some respects bouncing back and forth across the system counter clockwise.

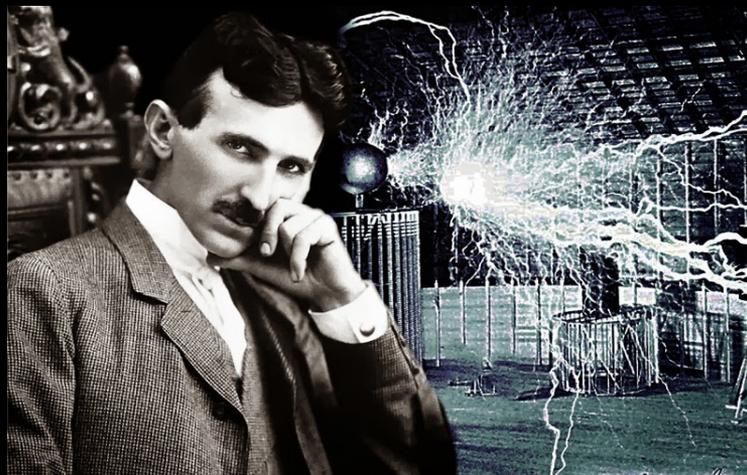

7 is the second prime position. It mirrors the path of 5 touching each position exactly opposite circle-crossing 5's path clockwise.

11 is the top left prime position. It cascades out to the left and circles back around the system.

1, or 13 rather, is the top right prime position. It mirrors 11, cascading out to the right and back around the system.

Exceptions to the prime positions occur when primes interact with each other. The first exception (35) to the prime position is when 5 multiplies by itself, or is squared. The second exception (35) is 5 interacting with 7. All other exceptions are multiples of 5 and 7 or 11 and 13. All squared primes land in position 1. All twin primes (pairs on the sides of 6 or 12 add up to be a multiple of 12.

Nikola Tesla Inventor

Do you think you're sitting still right now?

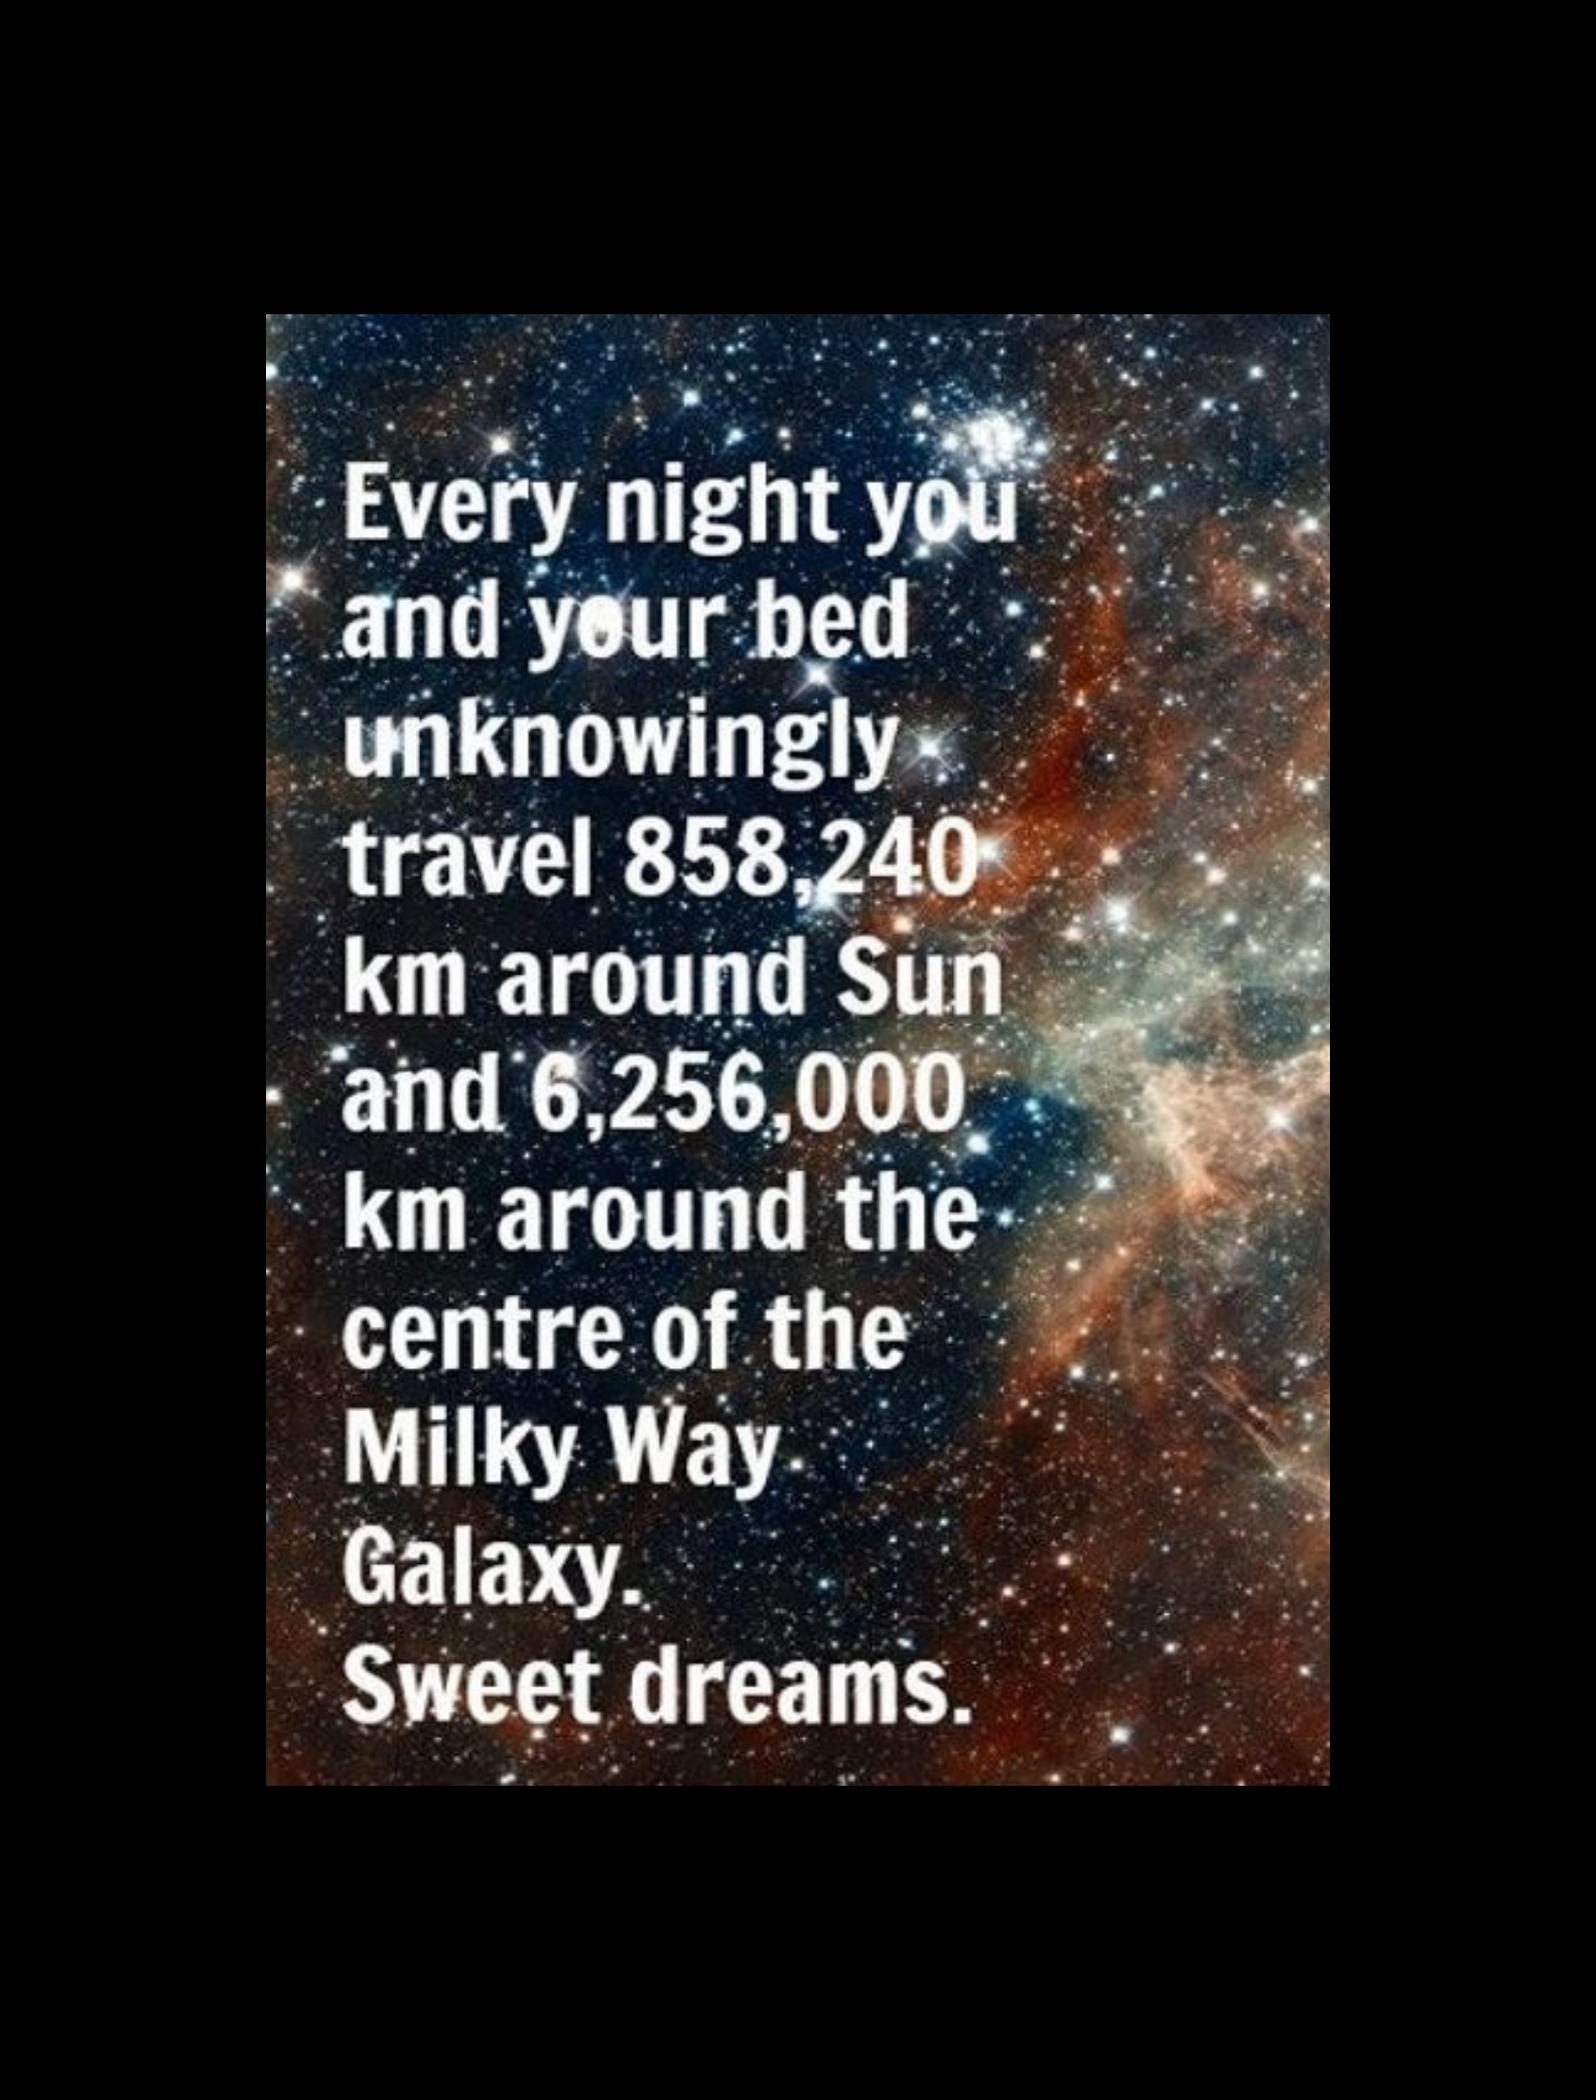

You're on a planet that is orbiting a star at 30km/s.

That star is orbiting the centre of a galaxy at 250km/s.

That galaxy is moving through the universe at a rate of 600km/s.

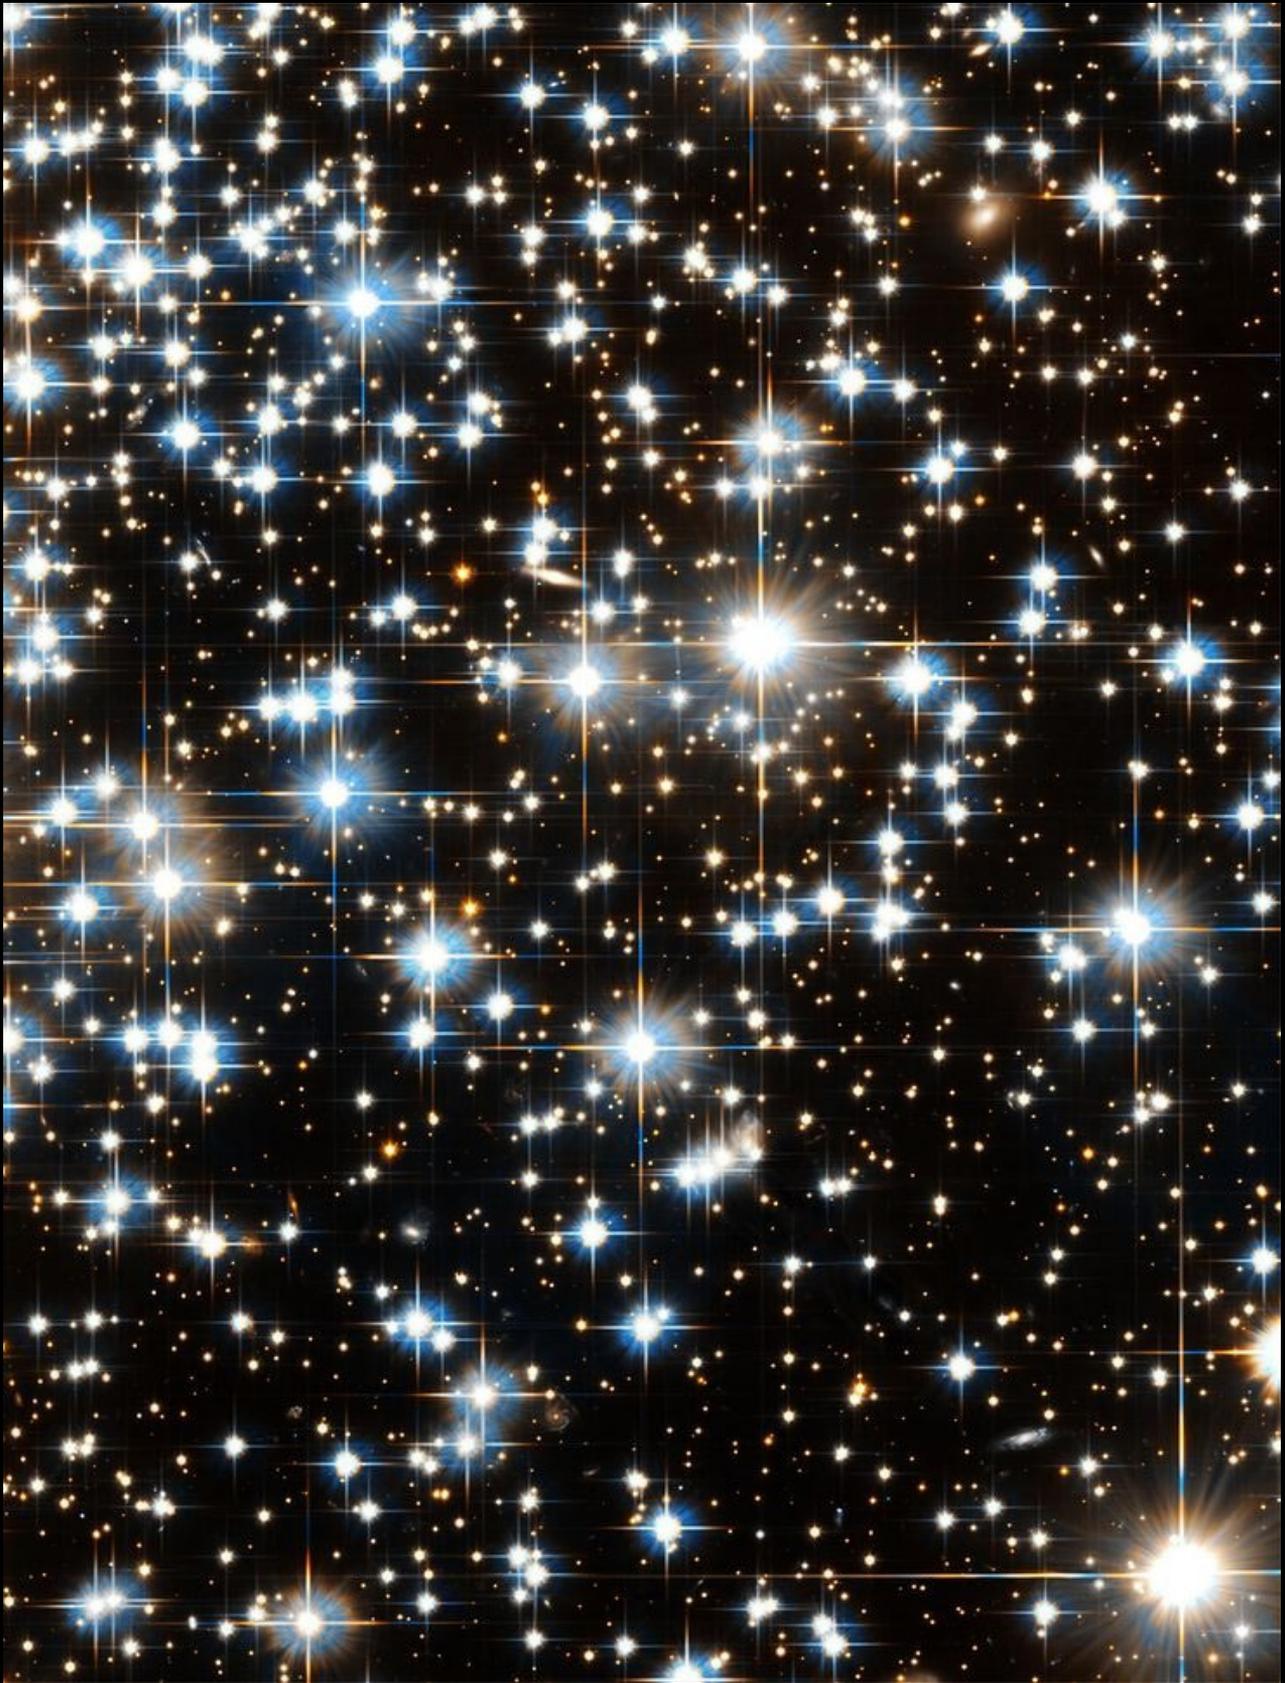

Since you started reading this, you have travelled about 3,000km.

**Every night you
and your bed
unknowingly
travel 858,240
km around Sun
and 6,256,000
km around the
centre of the
Milky Way
Galaxy.
Sweet dreams.**

We Live in a Cosmic Matrix of Living Energy...

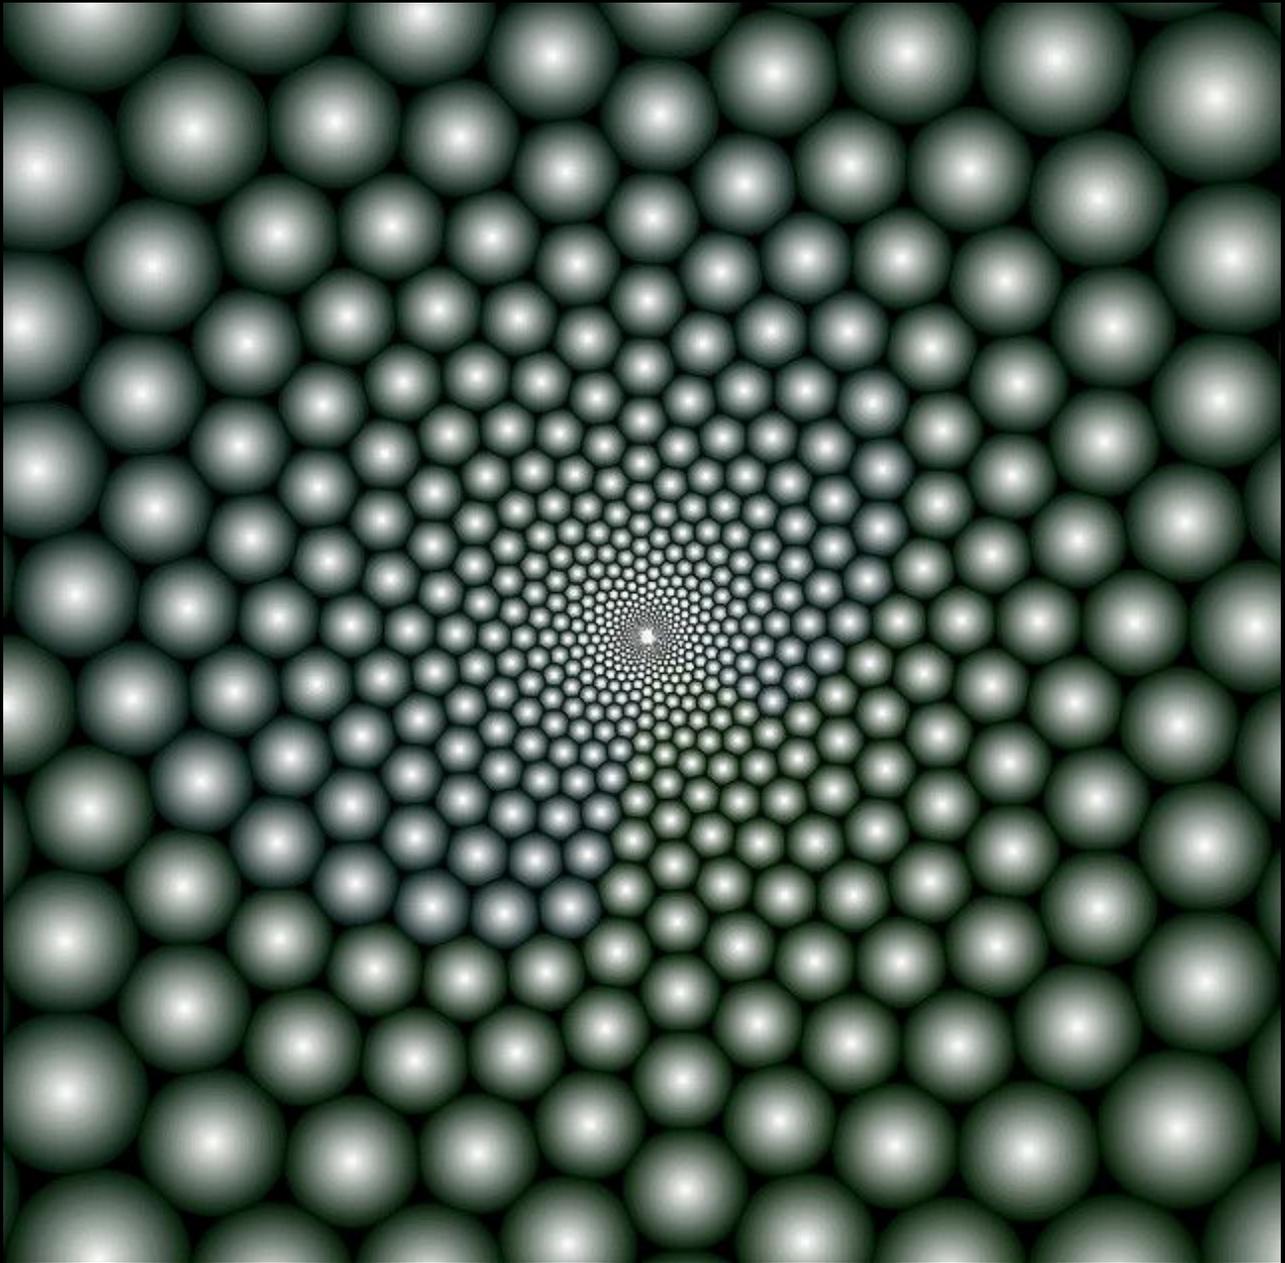

No telling what form it must really look like...

An **atom** is about
99.9999999999%
empty space.

If you removed the empty
space from the atoms of all
people, the entire human race could
fit in the volume of a sugar cube.

**THERE ARE
MORE ATOMS IN
A SINGLE
GRAIN OF SAND**

**THAN GRAINS
OF SAND ON
EARTH.**

PRAYER

is when you

talk to GOD,

MEDITATION

is when GOD

talks to you.

I AM
PURE ENERGY

I AM my very own healer
I believe I can heal myself through
affirmations and prayer

I AM healing myself

I AM aware of the energetic balancing and
am able to tap into that to heal

I allow myself to release all imbalances in
my consciousness

I know that my higher self uses the
frequency I need to heal right now

These frequencies heal
every aspect of my life

COPYRIGHT © 2010

I AM POWERFUL

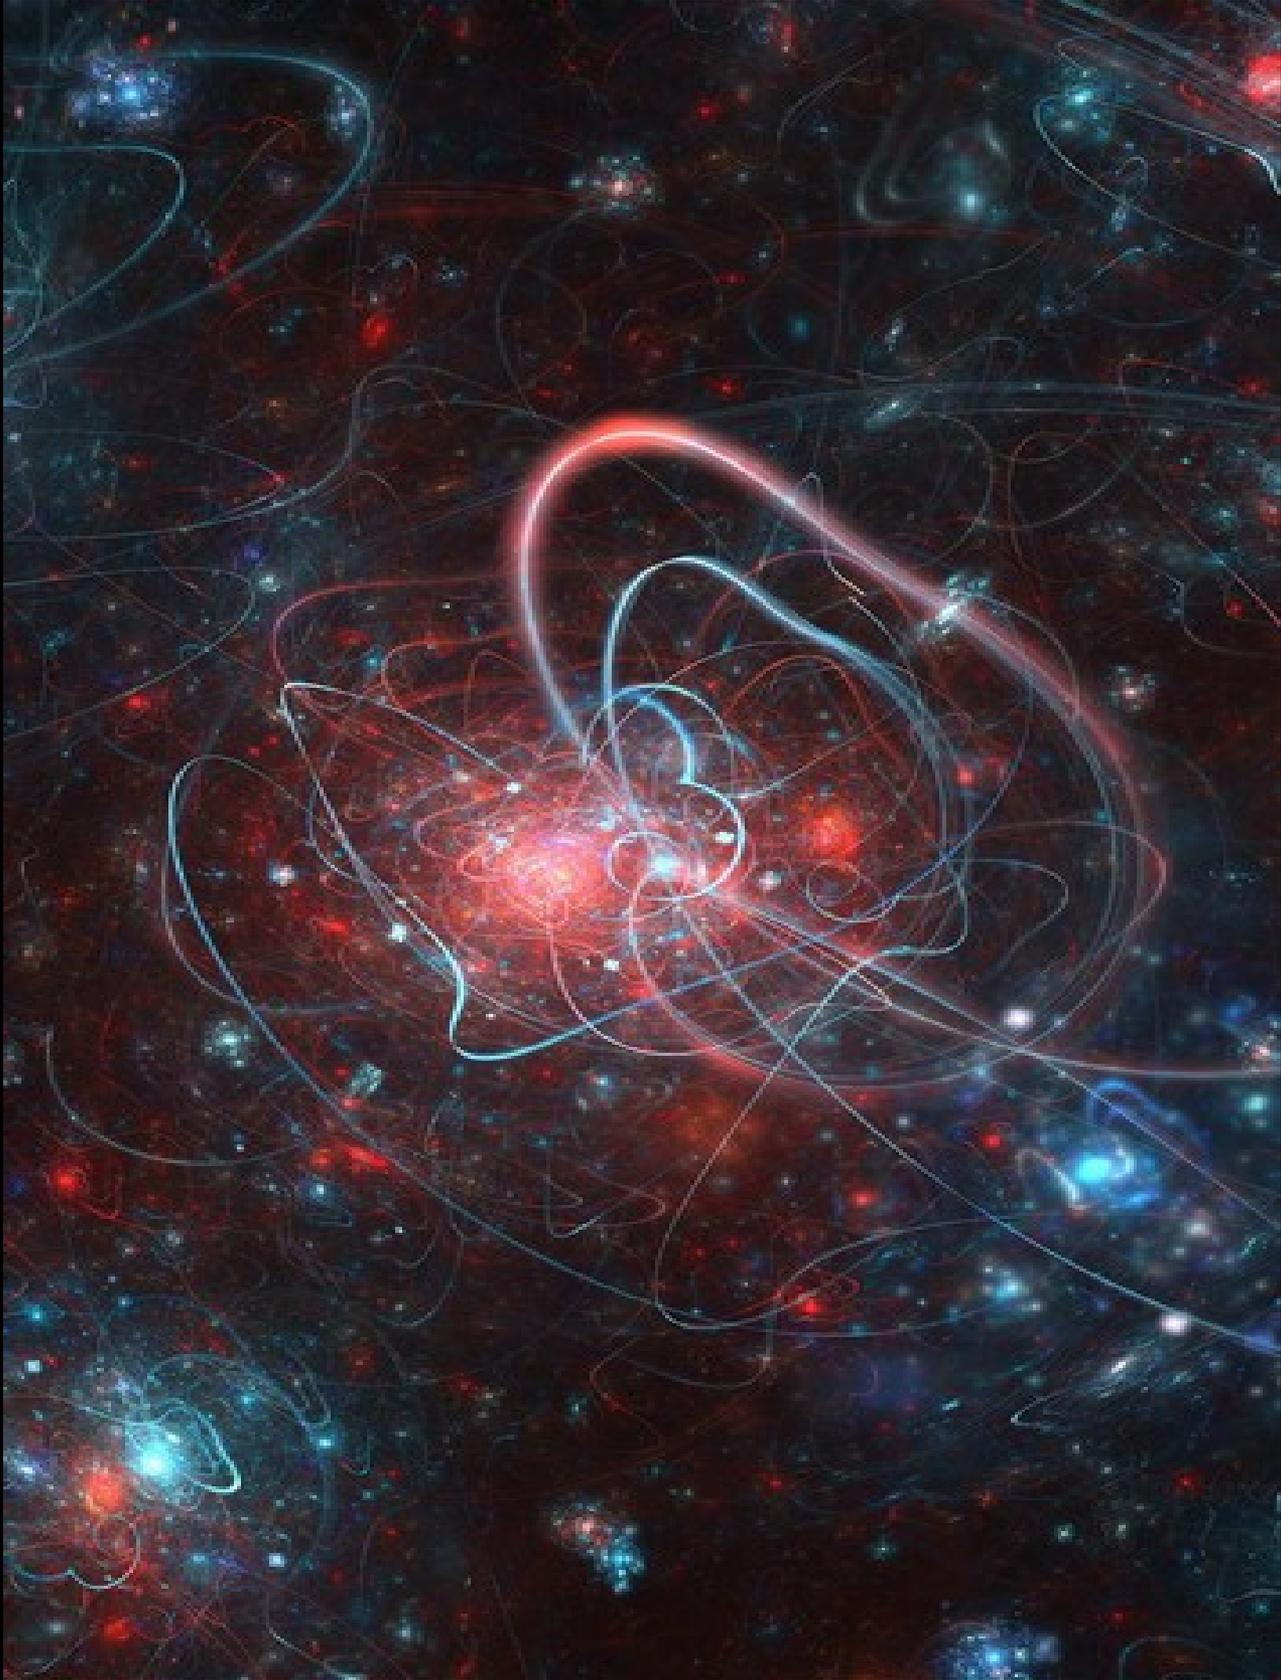

I AM MY OWN HEALER

I AM PURE ENERGY

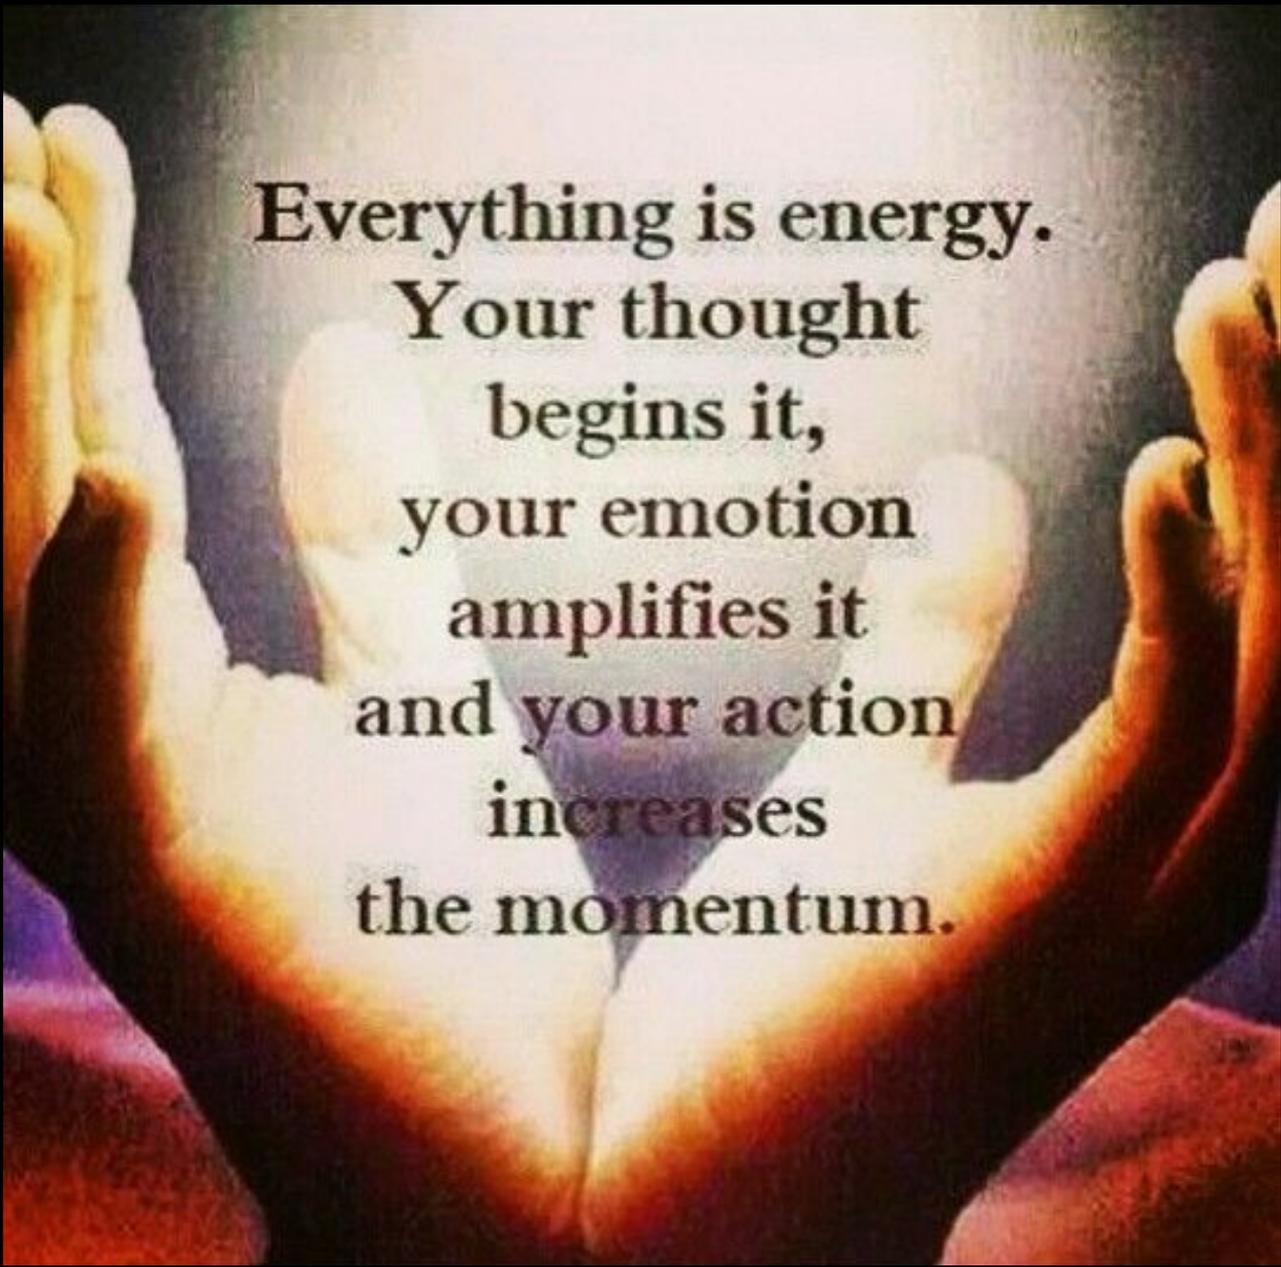

I AM SELF HEALING

I AM HEALED

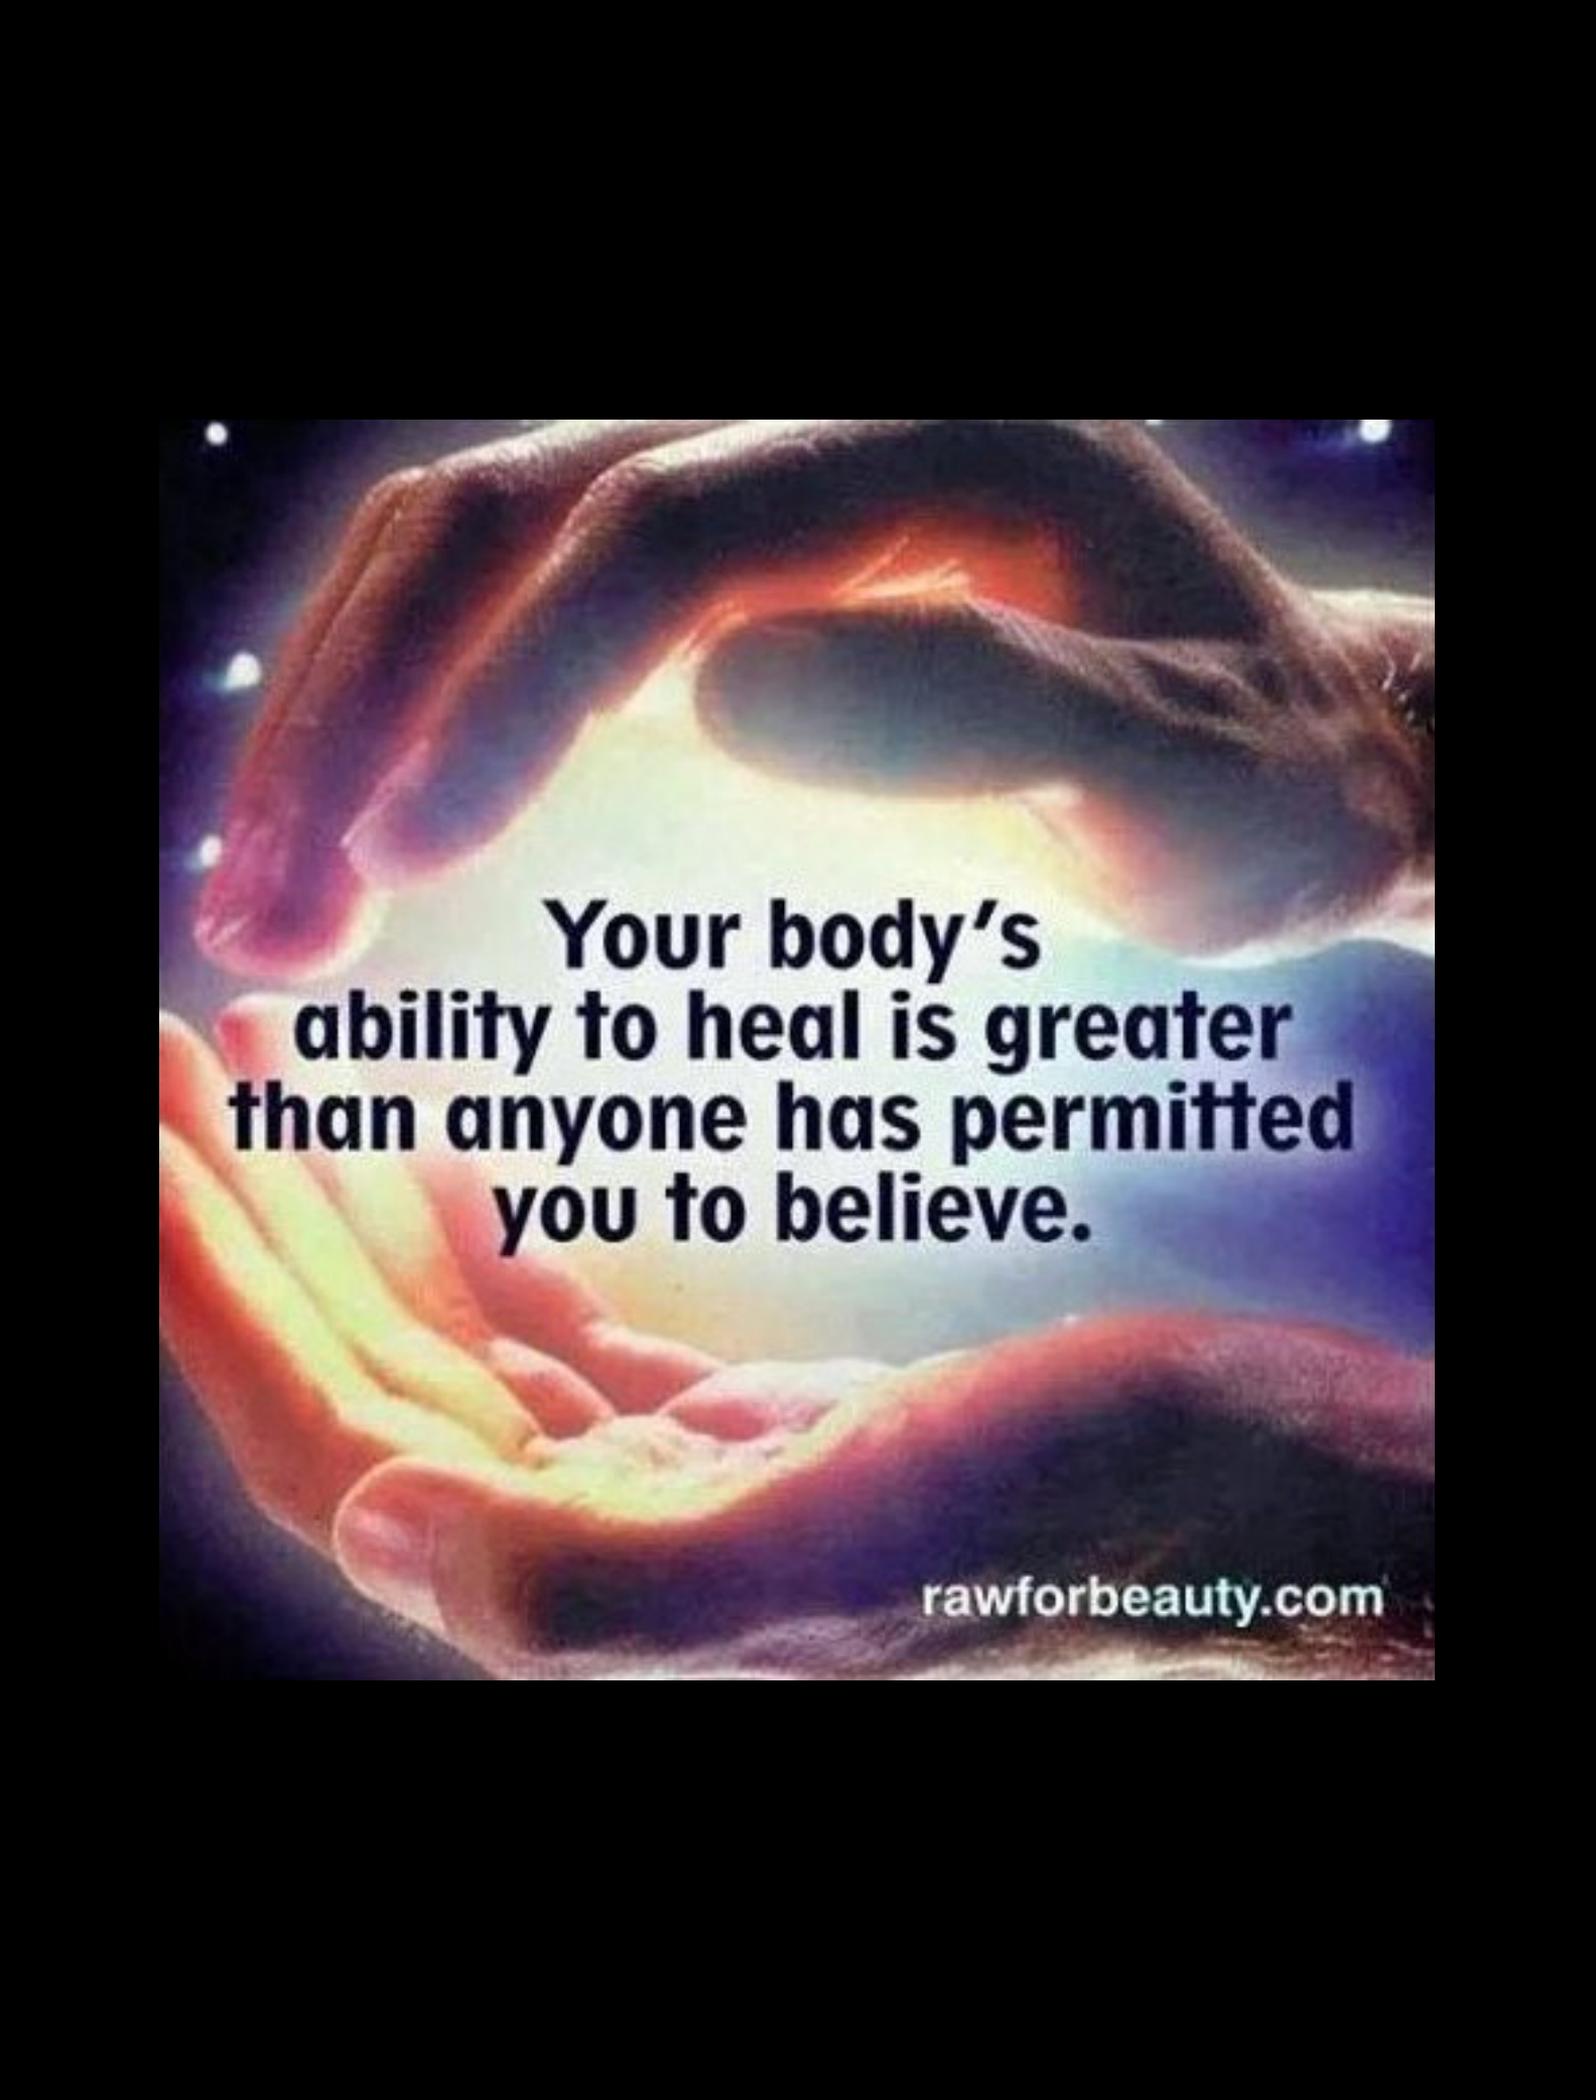

Heavenly Bodies
©/2010

Everything is energy.
Your thought
begins it,
your emotion
amplifies it
and your action
increases
the momentum.

**Your body's
ability to heal is greater
than anyone has permitted
you to believe.**
